

January 19, 2022

The REACH regulations became effective on June 1, 2007 and establish specific duties and obligations on businesses in the EU (European Union) which manufacture or import materials that include SVHCs (Substances of Very High Concern) in concentrations of more than 0.1% w/w. Materials are being added to the candidate list of SVHCs on a routine basis. Although not required to register any of its products directly with ECHA, SIMONA PMC is committed to assisting customers in their efforts to comply with REACH. To that end, SIMONA PMC has reviewed the most current formulations of our plastic sheet products and statements from raw material suppliers.

Upon review of these products, and to SIMONA PMC's knowledge, these products do not currently contain substances listed on the Candidate List of Substances of Very High Concern or the Authorisation List in excess of the applicable legal thresholds. The substances contained in these products are currently in compliance with the conditions and restrictions of Annex XVII of the REACH regulations. SIMONA PMC does not conduct analysis of the concentration of the listed substances but relies on supplier documentation for this information.
